

TEMPLATION  
ANGKOR

OUR  
**GREEN  
COMMITMENT**  
*chart*

## 1. Solar energy

360 solar panels installed in 2016-2018, covering power consumption required by filters and pumps for all pools.

## 2. Rainwater collection

Sufficient for watering the landscaped grounds during dry season. **Recycled water from drainage collection:** after treatment, used for garden watering by sprinklers and drip hoses.

## 3. One of the lowest density rates hotels

With only 46 accommodation units scattered around more than two landscaped hectares.

#### **4. Green roofs**

All villas and main building. Ensuring thermic regulation and adding to the water-and-flora theme.

#### **5. Maximum natural air- and light-flow**

Architecturally designed to restrict air-conditioning use to sleeping areas, spa and gym facilities.

## 6. Tree and bush planting

In addition to preserving mature trees during construction, Templantation maintenance team keeps making landscaped grounds more and more verdant.

## 7. Minimizing Single-use plastic

Around the whole property, including kitchen. Templantation has stopped using plastic straws since 2018, replacing them with **lemongrass stems**.

## 8. Glass recycling

In association with Gaea Waste Management company.

## 9. No fogging!

No herbicide, no insect-killing spraying, preserving butterflies, bees, birds around the grounds.

## 10. Refilled glass-bottled water

In guest rooms, conference rooms, library. On-site filtered water production, with free refills at restaurant, lounge, main pool area.

## 11. Nature-based packaging

For lunch boxes, kitchen pantry storage.

## 12. Responsible food-waste management

In association with a local breeding farm.

## 13. Sustainable use of linen and towels

Environment cards encourage guests to avoid unnecessary change of linen and towels.

## 14. Organic nature-based amenities

Mosquito repellent from organic lemongrass extract by **Bodia Beauty Care Cambodia**, organic plant and flower extract soaps and lotions by **Fleuraison**.

## 15. Power control switch

In all rooms, helping in minimizing electricity consumption.
